TCW·GAV COMPUTER SYSTEMS | GLICK AUDIO & VIDEO

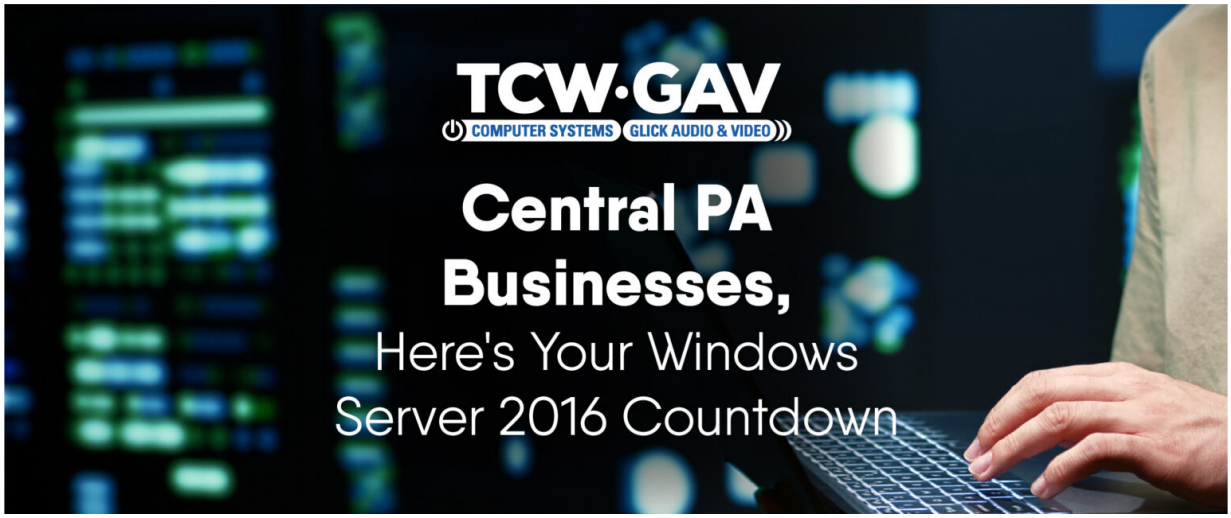

# TOP STORY

Phishing attacks have moved beyond suspicious emails, with cybercriminals exploiting text messages, cloud accounts, app permissions, and unpatched systems to get around traditional defenses. This Cybersecurity Awareness Month, TCW-GAV explores how the threat landscape is changing and the practical steps Lancaster and Central Pennsylvania businesses can take to protect their teams, systems, and data before attackers find an opening.

# THREAT RADAR

Windows Server 2016 is approaching its January 12, 2027, end-of-support deadline, leaving businesses without future security updates or technical support. For Central Pennsylvania businesses, waiting too long to plan a migration can mean higher costs, unnecessary downtime, and increased security risks. TCW-GAV explains your options and how to start planning a smooth transition before the deadline becomes an emergency.

# PRO TIPS

Local IT support should be about more than proximity. It should mean working with a team that understands your industry, your business needs, and the technology you rely on every day. With more than 30 years of experience serving Lancaster County and Central Pennsylvania, TCW-GAV explores what to look for in a local IT provider and how combining IT and audiovisual services can simplify support for your business.

⭐ **A Perfect 5.0 Review: Helping Lancaster Financial Firm Strengthen Security and Modernize Technology**

For an organization like **ASSETS**, technology is about more than keeping systems running. As a Community Development Financial Institution based in Lancaster, Pa and focused on supporting entrepreneurs and strengthening communities, ASSETS needed technology that could better support its mission while protecting sensitive organizational and customer data.

The priorities were clear: **increase data security, improve technical support, and upgrade aging technology.**

TCW Computer Systems/Glick Audio & Video helped ASSETS strengthen cybersecurity and data protection, implement technology improvements, and provide

cybersecurity training to help its team better understand how to protect both organizational and customer information.

The result was more than a technology upgrade. ASSETS highlighted the team's collaborative, patient and responsive approach and awarded TCW a **perfect 5.0 Clutch* rating across Quality, Schedule, Cost and Willingness to Refer.**

***"Their ability to guide our team through technological upgrades and training is unmatched!"***

It's a great example of what the right technology partnership should look like: **stronger security, better technology, and a team equipped to use it confidently.**
